

FLS Technical Training Professional Services

What kind of training do your technicians need? The FLS Training portfolio helps you understand the options that have been designed to meet your needs for every FLS equipment type.

<p>New Equipment?</p>	<p>Operation and Maintenance Training Customers can purchase a one time technical training or subscribe to continued courses. Training focuses on safety, operation, and maintenance of new equipment.</p>
<p>Experienced Technicians?</p>	<p>Advanced Technical Training The FLS training team can organise advanced training focused and customised to your equipment's current needs. Available in a one time purchase or a plan for recurring training events.</p>
<p>Low Efficiency?</p>	<p>Operations Efficiency Training Keep your mining site running smoothly and efficiently by scheduling regular refresher and optimisation courses for technicians.</p>
<p>Extremely Busy?</p>	<p>Webinars You can subscribe to a current catalog of webinar courses or contract to create a customised course to match your needs. Webinars enable multiple learners to connect across a range of locations and circumstances.</p>
<p>New Hires?</p>	<p>Essentials Courses Bringing new technicians up to speed can be stressful at a mine site. Enroll your technicians in courses focused on the basics. E-learning options are also a great choice for introductory learning for white collar workers as well.</p>
<p>Need Practice?</p>	<p>Virtual and Augmented Reality Shutting down a mine so technicians can practice on equipment isn't practical. You can purchase short on-line and instructor guided virtual and augmented reality sessions to gain safe and valuable experience.</p>

Email education@flsmidth.com for more information and to schedule training, or visit flsmidth.com/services/education.
